ABOUT GUNLAKE

Gunlake Quarries is a supplier of premium quarry materials across New South Wales. Gunlake Quarries is proud to deliver premium aggregate to Gunlake Concrete, as well as some of NSW's largest infrastructure projects.

Gunlake Quarries have established a modern hard rock processing facility in the Southern Highlands Murulan Area, which opened in the early 2000's. Two other plants quickly followed at Glendenning and Silverwater. The growth continues today with more plants planned for the future.

With reserves in excess of 180 million tonnes, our quarries have an expected life of over 100 years. Catering mainly for the Concrete Batch Plants in Sydney, the quarry processes a variety of different size aggregates and manufactured sands. Road Bases and Crusher Dusts are also produced which are supplied

With reserves in excess of 180 million tonnes, our quarries have an expected life of over 100 years.
